How to Open and Read VIA Issues

Value Investing Almanack (VIA) is published in the PDC format to protect the content against misuse and piracy. Every issue is protected with LockLizard Software.

Here is how you can open and read the PDC files –

1. You will receive an email from "LockLizard Licensing" with the subject line – "Viewing Protected PDF Files". If you have not received your license email, please contact Vishal Khandelwal at vishal@safalniveshak.com. Before that, check your spam folder, as sometimes license emails get marked as spam due to the attached zip file.

2. Open the email, and follow the steps shown in the image below to activate your license to open and view the VIA files in the future.

3. I have allotted you 2 licenses to access the VIA on 2 computers (or one computer and one mobile handset). So once you download the software and activate the license on 2 devices, you cannot read VIA on any other machine. So choose your devices carefully.

If you have any questions or doubts on how to access VIA issues, please contact Vishal Khandelwal at vishal@safalniveshak.com.
